

**YORK UNIVERSITY GEOGRAPHY ALUMNI ASSOCIATION
LECTURE PRESENTS: PROFESSOR EMERITUS MING-KO WOO**

Please join the Department of Geography in welcoming Professor Emeritus Ming-ko Woo from the School of Geography and Earth Sciences, McMaster University to speak about:

***Modern Myths in
Northern Science***

**Monday, February 6, 2012 at 7:00 p.m.
Accolade West Building, Room 205**

(Accolade West is south of Harry Arthurs Common;
Room 205 is at the end nearest Vari Hall.)

All are welcome

Professor Woo's research has focused on understanding the principles of catchment, hillslope and wetland hydrology as well as assessing changes in hydrological systems by environmental stressors such as climate variability and human modification to the landscape. More recently, he was the program leader of the MAGS project that studied how climate change and variability affects ice and snow dynamics and water resources in the Mackenzie River Basin.

Professor Woo is known first and foremost for his contributions to cold region hydrology. Much of his research took place near Resolute, NWT, where a river now officially bears the name McMaster River.
